April 04, 2024

Justin Mai
136 Lexington St
San Francisco, California 94110
United States

Application Number: 1000365540

Dear Justin Mai:

Congratulations! You have been selected to receive a 2024 National Science Foundation (NSF) Graduate Research Fellowship. The Fellowship offers three years of support over a five-year period which will be paid through your academic institution.

NSF publishes the names of Fellowship Offers and Honorable Mentions at https://www.research.gov/grfp/. Unless you indicated otherwise at the time of application, your name will be listed.

Please read the following information carefully and thoroughly to ensure that you understand the terms and requirements of the NSF Graduate Research Fellowship before accepting the fellowship. If you accept this offer, you are certifying to the National Science Foundation, a US federal agency, that you:

1. Meet the eligibility requirements detailed in the GRF Program Solicitation.
2. Intend to enroll or be enrolled for the entire period of the Fellowship, as a full-time student in a research-based graduate degree program in an eligible field of study at an accredited non-profit U.S. institution of higher education.
3. Have read, understood, and accepted the terms and conditions of the Fellowship described in detail under Fellow Responsibilities in the GRFP Administrative Guide for Fellows and Coordinating Officials.

Throughout the term of the Fellowship, you remain subject to all the requirements of the degree program in which you are enrolled as determined by your graduate institution. The NSF Graduate Research Fellowship cannot be combined or held concurrently with another individual federal fellowship, nor can it be deferred if you are not enrolled in an eligible graduate program.

Although the Fellowship is offered to you, the funds are awarded to your academic institution which is responsible for paying your stipend. You are not the Principal Investigator of the NSF GRFP award nor an NSF employee, you are a full-time graduate student at an academic institution whose graduate education and training is being supported with NSF Graduate Research Fellowship funds.

National Science Foundation
2415 Eisenhower Avenue
Alexandria, Virginia 22314

The Fellowship provides three years of financial support within a five-year fellowship period or until you graduate (whichever comes first), comprising a stipend of $37,000 per twelve-month Fellowship Year in monthly allotments of $3,083 that cannot be prorated or divided into smaller increments. Your academic institution will receive a direct payment of $16,000 towards the Cost of Education in lieu of all required tuition and mandatory fees for each of the three years of Fellowship funding. The use of the Cost of Education payment is determined by the academic institution, not the Fellow. All financial queries about your Fellowship should be directed to your academic institution.

The reviews of your application will be available on **April 15, 2024** in the GRFP application site. Please print or save a copy for your records.

To accept (or decline) the Fellowship, see the attached Instructions.

Being chosen as a NSF Graduate Research Fellow is a significant national accomplishment and places you among an elite group of Fellows, many of whom have gone on to distinguished careers in STEM or STEM education. We wish you similar success in your graduate studies and continued progress toward your aspirations throughout your career.

Yours sincerely,

Jacqueline Huntoon, PhD
Division Director
Division of Graduate Education

National Science Foundation

Alexandria, Virginia 22314

Instructions to Accept (or Decline) the NSF Graduate Research Fellowship by the Deadline: April 29, 2024

NSF GRFP functions are conducted in the NSF GRFP website. Bookmark it for convenience.

Attend an instructional webinar for GRF candidates on April 9, 2024, which will provide information and guidance on the acceptance process: https://nsf.zoomgov.com/webinar/register/WN_gj7NFyZbT8mRtyhfauOG1A#/registration.

Accept or Decline the Fellowship by April 29, 2024.

You must accept by April 29, 2024 or the Fellowship Offer will be CANCELLED.

Fellowships cannot be deferred. If you are eligible to apply again in the future, you must decline by this date or you will forfeit your eligibility. Watch the video at the NSF GRFP.Org website that shows you how to Accept or Decline the Fellowship Offer.

If you **Decline** the Fellowship Offer in the GRFP site, no further action is required and you can stop reading this document.

If you **Accept** the Fellowship Offer, you are an incoming Fellow and **must declare your Fellowship status.**

Incoming Fellows: Declare your status for Academic Year 2024-2025 by April 29, 2024.
You must declare your status for the coming school year in the NSF GRFP website by **April 29, 2024.** If you fail to declare status by the deadline date you may lose your fellowship. As part of your declaration you must indicate if you wish to receive a stipend and Cost of Education payment to your institution when your fellowship starts on September 1.

- If you wish to receive stipend and Cost of Education payment for the 2024-2025 academic year, you must declare your status in the NSF GRFP website as "on Tenure."
- If you do not wish to receive stipend and Cost of Education payment for the 2024-2025 academic year, you must declare your status as "on Reserve."

The Fellowship consists of three Tenure (funded) years and two Reserve (unfunded) years, for a total of five years.

Identify and introduce yourself to your institution's GRFP Coordinating Official (CO).
After declaring your status, identify the GRFP Coordinating Official (CO) for your graduate institution in the Institutional Directory (at NSF GRFP website under Quick Links) and introduce yourself as an incoming Graduate Research Fellow. The GRFP CO is the first point of contact at your institution for information on your Fellowship, and all queries (payments, fees, benefits, etc.) should be directed to your institution's GRFP CO.

Read and understand the GRFP Administrative Guide.
Along with the GRFP solicitation, the GRFP Administrative Guide is the definitive source of information, terms, conditions, rules and regulations about the GRF. When you accept the award, you are accepting all terms outlined in the Administrative Guide as well as the consequences of not meeting those terms. There are important things to know about the Administrative Guide:

- Fellow Responsibilities & Information are in Section 2 of the Administrative Guide.
- All Fellows, regardless of award year, are bound by the terms & conditions in the current Administrative Guide. Always consult the current version and disregard past versions.
- You can download the current Administrative Guide from the NSF GRFP website.

If you have a question about any aspect of your Fellowship, **start with the GRFP Administrative Guide.** Starting with the Guide ensures you will get your answer quickly from the definitive source. If you can't find the answer to your question within the Guide or if the Guide directs you to do so, **contact your CO**. You may need to remind your CO of who you are and why you are contacting them. If necessary, your CO will contact GRFP on your behalf.
